

# The Right Features Made Easy

Linxup has always had one goal: keep it simple, make it easy. GPS tracking doesn't need to be complex or expensive. Linxup focuses on making the features that really matter easy to use.

The Linxup GPS solution helps even the best-managed fleets improve their efficiency, reduce costs, and raise their level of service. Whether you're tracking vehicles or equipment, looking for insights from dash cameras, or seeking an ELD solution, Linxup is the easy, affordable and powerful answer.

Fleetio's preventative maintenance scheduling helps fleet managers stay on top of regular service items such as oil changes, mileage service intervals, brakes and more. Fleetio automates service reminders, helping to maximize vehicle uptime and road readiness. Fleetio also automatically forecasts the due date of a service reminder based on a vehicle's daily average usage.

## The Linxup Integration with Fleetio:

- Linxup customers can view locations in real time, can track electronic driver logs, see when assets leave designated areas and more.
- Linxup devices seamlessly integrate to Fleetio.
- Ensure vehicle mileage and preventative maintenance triggers are always up-to-date with automatic odometer readings that sync to Fleetio from Linxup every day.

-  Driver safety monitoring and reporting
-  Driver scorecards reduce liability and increase efficiency
-  Geofence alerts to know where vehicles are at all times
-  Email, text, and mobile app alerts to monitor vehicles on the go
-  Identify inappropriate use and theft with after hours alerts
